FOR IMMEDIATE RELEASE

CME Outfitters Leading the Way Towards the Future of Continuing Medical Education with Upcoming Virtual Reality Symposium

CME Outfitters to Host Virtual Reality Symposium at National Dermatology Meeting in Orlando, Florida.

BETHESDA, Maryland (February 16, 2017) – On Sunday, March 5, 2017, CME Outfitters (CMEO) will bring the future of continuing medical education (CME) to attendees of national dermatology meeting - being held at the Hilton Orlando in Orlando, FL - by offering a virtual reality symposium entitled, *The Latest on Key Nutrients, Dietary Supplementation, and Healthy Skin: A Virtual Reality Learning Experience*.

The condition of one's skin is known to reflect their general health status and aging; however, clinicians who treat patients' skin do not always consider what the skin may be saying about the overall health status of their patients. Nutrition plays a critical role in preventing disease and optimizing overall health and with the aging population in the United States, the link between nutrition, dietary supplementation, and healthy skin has become an area of growing interest and research. It is imperative for clinicians to be able to understand the physiopathologic process to support dietary supplementation to promote the appearance of healthy skin and to be able to recognize the role of key nutrients and dietary supplements in promoting healthy skin in patients. Clinicians also need to be able to evaluate the evidence and communicate with patients about the role of key nutrients and potentially dietary supplementation to promote healthy skin as part of the aging process.

This symposium, supported by an educational grant from Pfizer, Inc., features expert faculty Thomas J. Stephens, PhD, Jacquelyn R. Dosal, MD, and Jeanette Jacknin, MD, who will lead participants in a virtual reality activity and utilize iPad interactive technology to discuss the role of nutrition, vitamins, and dietary supplements in promoting healthy skin, allowing clinicians to make informed decisions and better care for their patients. Participating clinicians will enjoy a movie theater-inspired setting – complete with popcorn! – and access to virtual reality headset technology to create a cutting-edge and unique learning experience.

Limited seating is available to attendees of the meeting and spaces are expected to fill up quickly. Those who are already registered for the meeting may find more information and pre-register for this symposium [here](#).

About CME Outfitters, LLC

CME Outfitters develops and distributes live, recorded and web-based, outcomes- and evidence-based educational activities to thousands of clinicians each year and offers expert accreditation and outcome

services for non-accredited organizations. CME Outfitters focuses on delivering education to specialty audiences, with strong expertise in neuroscience, inflammatory, infectious, and autoimmune diseases, and cardiovascular disease. For a complete list of certified activities and more information, visit www.cmeoutfitters.com or call 877.CME.PROS (877.263.7767).
