FOR IMMEDIATE RELEASE

Leading Experts in Psychiatry & Neurology Gather to Share Latest Advances at 11th Annual Chair Summit

Presentations to address some of neuroscience's hottest topics including autism spectrum disorder, cannabis use in psychiatry & neurology, opioid use, pediatric OCD, and Parkinson's psychosis.

Bethesda, Maryland (March 13, 2018) - CME Outfitters (CMEO), a leading accredited provider in continuing medical education, is excited to open early registration for the 11th Annual Chair Summit, taking place February 7-9, 2019. After years of hosting Chair Summit in various cities across the country, the meeting is returning to South Florida permanently, with the 2019 meeting landing at the Westin Fort Lauderdale.

This unique two-and-a-half-day conference provides attendees with an opportunity to learn about the latest advances in evidence-based treatments for a variety of neurological and behavioral conditions directly from some of the most esteemed neurology and psychiatry department chairs in the nation.

Chair Summit is regarded as one of the preeminent meetings offered to professionals in the neurosciences, delivering innovative features each year. Chair Summit encourages a two-way learning experience and gives attendees more than just lectures, with small-group breakout discussions, networking events, and cutting-edge interactive technology that promotes engagement throughout the discussions.

"I've attended Chair Summit every year for the last 10 years, and it is the most outstanding CME activity that I have ever attended," Tony Graham, MD, a psychiatrist from Virginia stated. "It's all about the teaching: the small groups, the workshops, the technology that is used to support your learning during this activity, but most importantly the Chairs themselves. The Chairs from all over the United States not only teach all the sessions, but are also available in between sessions to chat. This is an outstanding and totally unique CME activity that you'll want to check out."

Chair Summit offers 20+ continuing education credit for physicians, nurses, pharmacists, social workers, case managers, and other clinicians with interest in the neurosciences. This year's topics include the use of cannabis in psychiatry and neurology, autism spectrum disorder, opioid use disorder, pediatric OCD, female sexual dysfunction, Parkinson's psychosis, eating

disorders, sleep disorders, ADHD, schizophrenia, migraines, and more. Early bird registration rates are available for a limited time. For hotel information, rates, registration and more, [click here](#).

About CME Outfitters, LLC

CME Outfitters develops and distributes live, recorded and web-based, outcomes- and evidence-based educational activities to thousands of clinicians each year and offers expert accreditation and outcome services for non-accredited organizations. CME Outfitters focuses on delivering education to specialty audiences, with strong expertise in neuroscience, inflammatory, infectious, and autoimmune diseases, and cardiovascular disease.
